A Paramount Picture

Stampede!—The mad, swift rush of thousands and thousands of frenzied cattle.

You'll see this and a thousand other thrills in the big companion picture to "The Covered Wagon."

Also a good comedy

CLARESHOLM LOCAL NEWS

Mrs. A. E. Quilly is reported on the sick list.

Miss Susie Sharples left last week for New Westminster, B.C., to spend the winter with relatives.

Mrs. C. F. A. Leeds left on Saturday last for California, called there by the illness of her sister.

Don't miss seeing the great picture "North of 36" at the Rex theater Friday and Saturday this week.

Mr. and Mrs. E. J. Dahlin left the first of the week for California, where they will spend the winter.

A dance will be held at the Greenbank school, Friday night, November 27. Three piece high class music.

Worry no more about making Christmas gifts—buy them ready made at the W. I. sale, November 28, Harrison Hall.

Sam Vaughan is laid up with a broken shoulder, the result of an accident while working on the Hayland threshing outfit.

J. A. Cove, of Braren's store, is in the Calgary hospital where he underwent a surgical operation. He is reported improving.

The ladies of St. John's Guild will hold their annual tea and sale of home cooking in the Parish Hall on Saturday, December 6th, at 3 p.m.

Starting the first Monday in December the Rex theater will put on pictures four nights a week: Mondays, Tuesdays, Fridays and Saturdays.

The ladies of St. John's Guild invite all lovers of needlecraft to visit their display on the fancy work table at the Parish Hall December 6th, at 3 p.m.

The week has been mild, with strong chinook winds and considerable dust. For those who had threshing still to do the weather has been favorable.

Are you seeking dainty trifles for a fastidious lady's Xmas joy? You can find them amongst the "French creations" at the Parish Hall, Saturday, December 6th, at 3 p.m.

John Edlund is getting around nicely now and will be prepared to handle the Christmas photo trade to the satisfaction of the public. Photos make very acceptable Christmas gifts.

Farrel E. Dickey of Claresholm and Miss Jean Burvash of Carmangy were united in marriage on Wednesday, November 18th, at Macleod. Mr. and Mrs. Dickey will reside on the farm east of Claresholm.

The Southwestern Symphony Orchestra will meet on Friday evening, November 27, in the Odd Fellows' Hall for rehearsal, and continue rehearsals every week throughout the winter. Prof. F. Blanck, instructor and director.

Embroidered pillow slips, scarfs, center pieces, baby layettes, house dresses, rompers, children's dresses, articles too numerous to mention taking up kind editor's space. See for yourself at Harrison Hall Saturday afternoon, Nov. 28.

Under instructions from Mrs. D. S. Parkinson of Grassy Lake, Auctioneer A. E. Runions will sell a big lot of horses, cattle, farm machinery and household furniture, by public auction, at Thos. Moore's barn Claresholm, on Saturday, November 28, starting at one o'clock. The terms will be cash.

The ladies of St. Andrew's United church intend holding their annual chicken supper and sale of fancy work in the Odd Fellows' Hall Monday, November 23rd. The sale of work will commence at 5 o'clock. Supper served from 6 to 8. Admission adults 35c, children 15c. Everybody welcome.

Meetings to organize a co-operative turkey killing and marketing center are being held as follows: Saturday, November 21st, 2 p.m., at the U. F. W. A. restaurant, Claresholm; 8 p.m., St. Anne school house, Monday, the 23rd, at Northern Light school. These meetings will be addressed by the Dominion Government poultry representative.

"North of 36," as great a picture as "The Covered Wagon," at the Rex theater Friday and Saturday nights this week. He sure to see it.

Harrison Hall is the place to prove the saying that "seeing is believing," and "tasting is proof of the pudding," afternoon Nov. 28, W. I. sale.

There were nine tables at the bridge party given by the Catholic ladies on Monday night. The prizes went to Mrs. Renneke and Mr. J. Reynolds.

Don't forget to see "Crimson Eyebrows" at the Rex theater on December 1st. This play will be put on by the High School Choral Society under the direction of W. G. Moffatt.

Clarence Long, one of the English boys attending the School of Agriculture here, was taken very seriously ill with pneumonia last week and is now in the local hospital. He is reported improving.

Some farm land has changed hands of late. L. C. Cramer has sold his farm west of town to Gus Ritzen, Ole Hustad and Otto Landin have bought the D. D. Farmer land east of Granum.

The chicken pie supper given last Friday evening by the ladies of Bethel church was a very successful affair, a large crowd being served. After supper a fine entertainment was given in the church.

A Dodge touring car, the property of A. Stange, was stolen from this place last week. The Provincial Police located the car abandoned on a Lethbridge street but so far the thief has not been apprehended.

R. E. Moffatt was chosen as the Liberal standard bearer, for the Claresholm constituency, in the forthcoming bye-election, at the convention held here on Thursday afternoon. He will make a strong candidate and if elected will fill the position with credit.

Last Saturday night a roll of blankets was stolen from a tourist car parked on Railway street. Some of the blankets were found on Sunday along the railroad tracks south of town, but the two most valuable ones were not recovered. The theft was evidently committed by some one leaving town by "side-door Pullman."

The heart of every true citizen will thrill at "North of 36," a spectacular, epic motion picture of the olden, golden West of the Texas cattle ranges. A romance of the pioneers and the terror and bravery of the Texas cattle trail. A glorious girl of the West is the first to lead her ranchers and cattle from Texas to "North of 36." Just as "The Covered Wagon" is a story of the linking of the East and West, so is "North of 36" an epic of the North and South. Just as the hardy pioneers battled their way westward to open a new country, so the early cattle men of Texas struggled northward with their great herds to open a new market. The dangers were equally great. "North of 36" coming to the Rex theater November 20-21.

IN THE DISTRICT COURT OF THE DISTRICT OF MACLEOD.

In the Estate of Fern Hoshaw, late of Claresholm in the Province of Alberta, Farmer, deceased.

Notice is hereby given that all persons having claims upon the estate of the above named Robert estate of the above named Fern Hoshaw, who died on the 8th day of September, A. D. 1925, are required to file with the undersigned J. R. Watt, Solicitor for the Executor, by the 30th day of November A. D. 1925, a full statement duly verified of their claims and of any securities held by them, and that after that date the Executor will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so given which have been brought to his knowledge.

Dated this 19th day of October A. D. 1925.

J. R. Watt,
Solicitor for Delbert Reynolds,
the Executor,
Claresholm, Alberta.

D. A. ANDERSON

Most Northerly Radio Station Now Keeps Arctic Circle In Daily Touch With Civilization

The Arctic circle is now in daily touch with civilization, through the formal opening to the public by the department of interior and department of national defence, of the most northerly commercial radio station in Canada. This station is located at Aklatik, at the mouth of the Mackenzie River, and lies 1,300 miles north of Edmonton and 125 miles beyond the Arctic circle.

The new station, in conjunction with others in the north, will supply a communication service for the Northwest Arctic and the Mackenzie basin, and will undoubtedly, it is stated, prove of great value to the many trading and transportation companies operating in that district. The country, it is found out, is very rich in minerals, and yearly export running into many hundreds of thousands of dollars. There are also evidence of rich mineral deposits, but this resource has yet to be developed. The oil wells at Fort Norman, 200 miles south of Aklatik, are already being developed. It is officially stated, and fuel oil and gasoline can now be obtained locally practically within the Arctic circle.

The opening of the Aklatik station and the previous opening of the Fort Smith station on Sept. 6, marks the completion of the department of interior on the western portion of the project in which the Northwest Territories station is interested. It will be recalled that the equipment of Aklatik station was lost when the Lady Kinderhook, of the Hudson's Bay Company fleet, sank off the coast of Newfoundland, August 12, 1923. The completion of the Northwest Territories radio system had, therefore, to be postponed for a year until new equipment could be shipped in down the Mackenzie River this summer.

Going Back To Grain

Predicts U. S. Cattle Lands Will Be Planted In Wheat

Ten million acres of land in the southwest, heretofore used for cattle ranges, will be planted in wheat within the next eight years, C. G. Hays, of Dodge City, Kansas, predicted in an address at the 29th annual meeting of the Grain Traders' National Association at Kansas City.

He said properly was ahead for the large farmer of Northern Texas, such as Texas, Oklahoma, Colorado and Western Kansas if the change to grain from cattle is made. Much of the acreage which he predicts will go into wheat lands have been underdeveloped, he said.

"This is the first year the United States has been on a wheat basis," he said, "and it is the first year that the wheat tariff has benefited the farmer."

No Crop Failures

Stated That There Was Not One Crop Failure In Manitoba

Not one crop failure in the province of Manitoba is the report of the provincial department of agriculture recently released.

The department's report on the threshing machines are satisfactory and a generally optimistic tone prevails.

Ninety per cent of the crop in threatened in the Red River valley and as far west as Portage la Prairie, and other farms were well in hand. Averages per acre from 41 reports received show wheat yielding 19.3 bushels; oats, 41 bushels; barley, 23 bushels; flax, 12 bushels; and 18% bushels. These are higher in every case than final averages for the 10 past years.

Potatoes promise a good crop. Pumpkins are better than in years. Pumpkins are nicely started. Stock is in good condition. The dairy industry showing increase of butter output over last year.

Clock 700 Years Old

On the Wells Cathedral in London is a clock, constructed by a monk from primitive material and which, it is said, is some 700 years old, but which still is in faultless condition. Besides giving the hour, the clock records the quarters of the moon and on the stroke of the hour a group of medieval figures break into life and wind round with the last dances die away.

Earth Has Growing Pains

A tremendous earth quake, says a young man, explains Prof. Charles W. Brown, geologist of Brown University, Providence. The series of earthquakes on the Atlantic and Pacific coasts during the year are more evidence of growing pains, he says in Popular Science Monthly. When the earth finally gets adjusted and settled in its new size, there will be no more quakes.

Electric Ship Transports Grain

Carries 70,000 Bushels of Barley From Duluth to Montreal

Montreal placed another notch on its history when the Twin Cities, the first electrically driven ship to use the port of Montreal, left after unloading 70,000 bushels of barley.

The Twin Cities, owned by the Minnesota-Alberta Transit Company, came from Duluth. Her gross tonnage is 1,400 tons and she is capable of carrying 7,000 tons on a fourteen-foot draught.

The boat, which gave the appearance of a dismantled ship, is entirely electrically driven. She is controlled by the Twin Cities Electric Light and Power Co. and is one of the features of the ship, that is she is powered by twin rubbers and twin screws, both of which are controlled from the wheelhouse.

When coming through the canal the new, davits and wheelhouse were brought down to ganway level to permit the boat to pass under the stationary bridges in the canal.

Capt. Martin Peterson was in charge of the boat and crew of 18 men, and he stated this was the first trip made to Montreal.

Her speed is ten knots an hour and all she requires, he said, on the trip from New York to Wallaseburg, Ont., to Detroit and back to New York, is thirty tons of oil fuel.

All of her appliances are of the electric type, and she is electrically operated; and she has accommodation for 600 tons of pack- aged freight electrically refrigerated.

She expects to maintain a regular service to this port with the sister ship, the Twin Ports, both of which are the properties of Henry Peterson, of Cleveland, Ohio. Both boats cost in the neighborhood of \$200,000.

Indian Lookout Used By Forestry Service

California Rangers Keep Watch In Pine Trees 200 Feet High

An Indian lookout in the form of a venerable pine tree, in the vicinity of Lake Arrowhead, Cal., is one of the valuable aids to the United States forestry service.

The ancient tree, nearly 200 feet high, serves the ranger lookout even as it served Indian warriors, scores of years ago in tribal wars.

At the base of the pine stands a small hut, the post by the Indians was used by the United States forestry service to keep continual watch in the large tracts for forest fires.

They are equipped with powerful glasses and telephones, in modern contrast to the sharp eyes of the aboriginal lookout and his crude wig wig system.

Canada a Beautiful Country

New Resident of Alberta is Pleased With Its Attractions

Visitors and new settlers in Canada are impressed, not only with the opportunities which the country offers, but with its beauty and attractiveness.

One such a new resident now living in Alberta writes a Canadian agent as follows:

"As you are familiar with this season of the year in Western Canada, you are familiar with the fact that this is the first year in the history of the world that the snow has melted so early and so completely. This year is very favorable to farming, and the thawing gives a great pleasure and enjoyment to all. I am greatly enjoying it."

Average temperature of the Canal Zone is 73 degrees.

Captain R. G. Latta

Has been found in South Africa which can run faster than a horse.

Wheat Belt To Move North

Discovery of "Garnet" Wheat Will Extend Crop Area

It is reported that the new wheat called the Garnet may push the wheat belt 100 miles farther north. The new wheat is said to be rust resistant and if the claims advanced are true, L. H. Newman, cereal specialist of the Canadian Government, prove true. It will be a rival of the famous Marquis wheat, now the popular wheat in Canada and among the majority of American wheat growers.

Claims advanced by the Canadian official for this new wheat are that it is a much heavier yielder than the Marquis, under any condition producing almost twice the crop, and that it ripens from a week to ten days earlier than the Marquis, which enables it to escape the possibilities of rust and early frosts.

The wheat has been distributed throughout Canada for further testing. It continues to justify its early promise the rust problem will be reduced to a minimum. This pest causes losses of millions of dollars. Wheat growers are anxiously awaiting the results of the tests with the new grain.—Montreal Witness.

Manitoba Sugar Beets

Plots Grown For Experimental Purpose In Eastern and Southern Parts of Province

The analysts of sugar beets grown in experimental plots in Manitoba, have commenced and will continue for the next month, according to the secretary of the Manitoba Sugar Company.

These beets, grown in purely experimental plots, have been produced on a total of 260 plots throughout the province, chiefly in the Red River and Assiniboine valleys. The early wet weather was a hindrance to the beet crop as it delayed maturity and the cutworms were bad in places. In spite of these factors 80 per cent of the beets, grown in a purely experimental trial at the factory there. Arrangements are already being made to increase the acreage considerably for next year, when it is planned to ship the crop to the factory for use in commercial production at Grand Forks.

Increased Gold Production

Ontario Holds First Place By a Wide Margin

Gold production in Canada in the first half year in 1925 reached a new record of \$2,643,000, worth \$17,054,485, as compared with \$1,054,000, worth \$6,487,511 in the same period last year. Ontario continued to hold a big lead with 70,714 ounces, as compared with 57,413 ounces in the first half of 1924.

From the Porcupine field the production amounted to 47,548 ounces, nearly 82 per cent of the total for Ontario, while Kirkland Lake produced 12,477 ounces, or 18 per cent of the total. Other fields yielded 12,444 ounces worth \$2,222,424. Small amounts were recorded for Yukon, Manitoba, Quebec and Nova Scotia.

Canada's copper production in the first half of 1925 amounted to 53,055 tons, as compared with 42,221 tons in the same period last year. In value over the year 1924 it was 55,127 in value over the year 1924.

A bird, the size of a sparrow, has been found in South Africa which can run faster than a horse.

Utilization Of Straw For The Manufacture Of Paper May Mean Much To Western Farmer

Fitting Unemployed For Overseas Work

Further outlines of schemes promoted by the British Government for providing training for young unemployed men which will be calculated to fit them for farm work. One of the four residential training centres will be at Clayton, near Ipswich, and those accepted will be trained either for farm work in England or overseas. A start will be made with about 1,200 men, of whom 200 will be slated for overseas.

Applicants for training with a view to employment overseas must be: (a) provisionally approved by a representative of the Dominion authority, and before entering training, sign an undertaking to remain throughout the training and to accept any possible transfer, to proceed to the Dominion command, if finally approved for employment there. (b) Single men between the ages of 19 and 25. (c) Men who served with the forces during the Great War the upper age limit shall be 19 and 25. (d) Men who are unskilled, i.e., men who have had no opportunity of learning a skilled trade. (e) Men who have received a course of training at public expense or financial assistance from the civil-employment or King's funds.

The precise nature of the course of training for overseas employment may be varied from time to time, but it is intended, generally, to be training in: (a) The handling of horses, including ploughing and care of livestock, (b) The training in the use of tools, (c) Simple agricultural operations, (d) Elementary woodwork, (e) The use of simple tools, such as plane, chisel, saw, cut, maul, wedge, axe and bill-hook. (f) The erection and repair of wooden and wooden instruments, and where necessary, (g) Timber falling, and (h) Simple repairs to farm implements.

An Opportunity For Canada

Farmers Could Work Up Big Chances In Meat Export Trade

More and more it is becoming apparent that Canadian farmers should look forward to the formation of a big cattle meat export trade and this in spite of the apocryphal statement from the Dominion Government. The latest expert to speak on the subject is Secretary-Treasurer McLean, of the Harris Agricultural Company. He maintains that Canada has the natural advantage necessary to become the chief external source of beef to Great Britain, and that her cattle can be finished on grain, an advantage which her competitors, Australia and Argentina, do not possess. Further than this, he claims that Canada could be delivered in Great Britain in two weeks and thus practically be the same as the British cattle, more particularly so, as everyone knows the meat is "improved" by "hanging."—Kingston Standard.

Record Grain Loadings

All Records Are Broken at Lake Ports

The record for the unloading of grain cars at the port of Port William, Port Arthur, was twice broken in the week ended October 2, first on the 29th September, when the highest record hitherto made, which on November 6, 1923, was eclipsed by 61 cars, and on October 2nd was broken by 42 cars. The number of cars unloaded on the latter day was 2,434-7,192,217 bushels being unloaded.

Establishing what is the largest record for movement of wheat, grain poured into Port William and Port Arthur elevators at the rate of nearly thirty bushels a second for the whole of the twenty-four hours of October 10th from Canadian Pacific Railway cars. In all 1,794 cars were unloaded during the day and each car carried 1,200 bushels of wheat, resulting in a total of 2,154,000 bushels.

Artisan For Women

A dainty little sorcerer designed especially to appeal to feminine tastes, has appeared in the London market. It is a small, round, gold, (valued at \$1,500). It is a one-piece and it built, the manufacturer says, "for the woman only."

The Royal Aero Club of Great Britain has granted flying certificates to seven women.

Most of our common sayings are very old, and doubtless "You can't keep a good man down" was coined by the whale.

The Future of the Paper Industry

And, indeed, the future of the whole world of paper, the most closely associated industry to those who are most anxious to those owing to the diminishing supply of paper material from wood. The United States is the greatest consumer of paper in the world, and as its own soft wood supplies have been nearly exhausted it has come to depend largely upon Canada and to draw more and more upon Canadian forests.

Not long ago the London Morning Post published an issue on paper made from straw, and the unequalled success seems to have definitely lifted the question from theory to practice. The trouble experienced in the past, as stated, has been with the brittle nature of the paper, but ten years' experiments have overcome this difficulty. This De Valois process, as it is known, has been perfected in French factories, and, according to the same paper, the work to be continued on a large scale in Canada.

For some considerable time experiments have been in progress in Canada looking to the utilization of waste straw, and the manufacture of paper. Under the sponsorship of the Canadian Pacific Railway a method of using straw for the manufacture of high grade papers was perfected. More recently tests have been made with waste straw, and the results under the Baccus-Wieg process at Edmonton, Alberta, under government supervision, have shown that efforts are being made by the producers of straw to interest capitalists in the commercial manufacture of this product.

It would seem inevitable that sooner or later straw will become a raw material in the manufacture of paper. This will mean a gigantic industry in Canada and the definite removal of any danger of a loss of supremacy in the newspaper industry through the declining forest supplies. Such an industry will, in addition, mean the utilization of enormous quantities of straw, which is now wasted, for it is estimated that 7,000,000 tons of straw are burned annually in the Dominion, and this is increasing yearly. In Eastern Canada there is a use for straw in connection with the livestock industry, but in the west the burning of straw still after threshing is a sad feature of an unbalanced industry. The use of straw in paper making will bring additional revenue, but employment, preserve a great industry for the world, and retain an expert trade for Canada of prime importance.

Shipping More Butter

British Importers Taking Large Quantities of Canadian Product

Butter exports via Montreal are more than twice as heavy so far this year as they were in 1924, and the movement of exports is also larger, although not in the same proportion. During the first nine months of the year, exports through the port of Montreal amounted to 255,127 packages of butter and 757,043 boxes of cheese, as compared with 122,424 during the same period in 1924. During one week in September, 1925, 12,224 packages of butter and 65,455 boxes of cheese were shipped, Manchester, Liverpool and London, taking large quantities of both, and listing a heavy consignment of cheese.

Competition At Regina

Girls and Boys to Show Aberdeen Angus Calves at Winter Fair

Girls or boys in Saskatchewan who wish to get Aberdeen Angus calves to show at the Winter Fair in 1926 should apply to the Secretary of the Saskatchewan Aberdeen Angus Club.

Breders of Aberdeen Angus cattle having calves born in 1925 (pure-bred or grade) suitable for girls and boys to show in the Winter Fairs of 1926, are requested to communicate the date to James W. Brown, Secretary, Sask. Aberdeen Angus Club, Neudorf, Sask.

Spartan Race Impossible

Have you had your ultra violet rays this morning? If you haven't, your health may be "an almost anatomical affair," according to Dr. C. M. Westerman, in an address to the Physico-chemical Association at Chicago.

The doctor said that if everybody could get his full share of the ultra violet, a skin race would be created, but smoke and just tall buildings intervened, he said.

Wife: "How do you like my radio?" I got the recipe over the radio; it's a western dish.

Husband (lying to wife into the radio): "That recipe must have been broadcast through the Rocky Mountains there."

ELK INITIATION ON
WEDNESDAY, DEC. 9

Tony McKinley, grand organizer for the Benevolent and Protective Order of Elks, has announced that the big initiation and institution of Clareholm Lodge of Elks will take place in the Odd Fellows' Hall on Wednesday, December 9, at 8:30 p.m. The dance hall will be used as the lodge room would be too small for the large class of candidates and the great number of Elks that will be in attendance from outside points. There will be initiatory and installing officers from Calgary and other points.

After a recent survey of the Clareholm jurisdiction Mr. McKinley says that there will be no difficulty in securing one hundred good citizens to take the degree of Elkdom.

Mr. McKinley has this to say about the introduction of the order into Clareholm.

"If the institution of an Elk lodge meant only the addition of one more lodge to the number already operating in the jurisdiction, its institution would still be of considerable interest to a great many men who are familiar with the order in its fraternal relations between man and man as fellow members. This is the selfish feature of a fraternal organization. To one or more of these organizations most of us belong, and we are quite properly pledged to assist each other in any manner within the law possible. But there is a broader day of fraternal dawning and all people are beginning to realize that there is a need for every community for an organization which aims at being of service not only to its members but to the community at large. This is why the Elks, the Rotary, the Kiwanis, the Gyro, the Kinsman and other such organizations are so rapidly gaining in public favor."

As to those whose needs are already well provided for in the present fraternal order, Elksdom must appeal in a different way for their support. In order to gather into its fold the best in every community, our order must stress the usefulness of its aims and purposes. In its appeal for support it comes in contact with those people who are from Missouri and it must show them. And everywhere that the seed of Elkdom is planted, the people are shown that it does things—that it has the punch—the kick—the inclination and the determination to be of service not only to its members, but to other men, and women, and children of the community.

"And when the order is supported by the best citizens who belong to the other orders and who are trained in fraternal life across and by men who belong to no other order but are ready to go when given proper lead and be men of many races and creeds, Elkdom shows its true heart. And from that heart springs a 'kinder,' producing not only barrels of wholesome fun and sport for its members and their friends, but what is more important, barrels of sunshine and good in its jurisdiction."

"It fosters good clean sport everywhere. And what is life without sport? How many are there who do not eagerly devour news of sport in other places? Why not have some of your own? It only requires something like the Elks to get the good sports together. There are plenty of them here and everywhere."

"It is a patriotic order. It inspires its members to reverence and love the flag, and the things they happen to live and earn their daily bread."

"It is democratic. It invites and admits to membership all good citizens of high and low degree. In the big Detroit lodge you will find Horatio Alger, the great author of the 'Hunchback of Notre Dame,' in the Lincoln, Nebraska, lodge, the great commander William Jennings Bryan rubbed elbows with the thirty years with the lowliest of his fellows."

"It teaches respect for the good old flags of books. Yet it is non-sectarian, and welds together in harmonious fraternity, people of many races and of many religions for a more united and happier Canadianism."

"It will not injure other orders.

It puts more pep into their members. It brings the dead ones to life and engenders in them a new spirit of activity and unselfishness."

"There are few people who are wholly selfish. Most people who are selfish are but the victims of some wrong environment some time in their lives. They are still in their shells. Elkdom creates a new environment. It cracks the hardest shells."

"North of 36" Pictures Thrills of Pioneer Days

The journey of Columbus across the Atlantic in 1492 required no more courage than the trip made by the pioneers of the south in their attempt to establish a definite trail between Texas and the railroads in Kansas.

The first caravan traveling from the Gulf of Mexico to northern United States faced fearful odds—Indians, Carpet-baggers, floods, fire, wild animals, and more obstacles described in Emerson Hough's historical novel, "North of 36," which Irvim Willat produced in picture form for Paramount.

Like Columbus, the first caravan hivan had no guide save the stars and stars. Nobody had ever been over the trail before. Those who had attempted never returned to tell the tale. What happened, nobody ever knew.

In "North of 36," the first journey from the south to the north is told upon the screen. The picture for scene is actually occurred sixty-one years ago. Nothing has been left out, nothing has been added, and the picture of the hardships and suffering of the brave band was so thrilling that it required no change to achieve the supreme in drama.

Prominent in the cast is "North of 36" are Jack Holt, Ernest Torrence, Lois Wilson, "The Covered Wagon" girl, and Noah Berry. The picture comes to the Rialto theater on Friday and Saturday, November 20-21.

Santa Approves a Christmas Gift

Santa Claus has been down a great many chimneys since he started his business, and he is intimately acquainted with a large number of people. He knows that the best kinds of gifts are those which please the whole family, in bringing the excitement and enjoyment of Christmas every week. This is why he receives hundreds of subscriptions to The Youth's Companion with which to fill his sack. And, being wise from long experience, he knows that people are likely to overlook things around Christmas, so he chuckles when he sticks Companion into the top of a stocking. "Be as greedy as you like," he thinks, "the more the better for its people."

The 52 issues of The Youth's Companion for 1926 will be crowded with serial stories, short stories, editorials, poetry, facts, and fun. Just send your order to the address below and Santa will take care of delivering the Companion to your home or to the home of a friend. Subscribers will receive:

1. The Youth's Companion—52 issues in 1926, and
2. The remaining issues of 1925. All for only 82¢.
3. Or include McCall's Magazine, the monthly authority on fashions. Both publications, only \$2.50.

The Youth's Companion, S. N. Dept., Boston, Mass. Subscriptions received at this office.

To Give You an Idea of How Big "North of 36" Really Is

Featured Players—Jack Holt, Ernest Torrence, Lois Wilson, Noah Berry.

Producers—Irvin Willat, who made "The Heritage of the Desert" and the natural-color picture "Wanderer of the Wasteland."

Author—Emerson Hough, who wrote "The Covered Wagon." This story, like the "Wagon," ran in the Saturday Evening Post.

Support—David Dunbar, Stephen Carr, Guy Otter, William Carroll, Clarence Geldart, George Irving, and Ella Miller.

Camera—Guy Wilky.

Type of Story—A story with the same sweep as "The Covered Wagon," with a theme just as big and vivid. It is a story of pioneers in a story of Texas, during its most interesting period. The time is directly after the Civil War.

The terrific struggle of the cattlemen to find a market for their stock and the hardships endured by the settlers of that state are very clearly shown.

The general theme of the story, the huge cattle drive, carries one through early Texas, Oklahoma and Kansas. "North of 36" is more than a mere picture—just as is "The Covered Wagon."

Here and There

Sport conditions are very good in New Brunswick this year. Harold Chadwick operating, hunting camp in the province reports that at the end of September catches of speckled trout, weighing 18½ lbs. were taken one day while a hunter took out a big game licence September 23rd and three days later had his deer and bear.

The world's most northerly police post, also the most remote of any human habitation, is to be constructed next year for the Royal Canadian Mounted Police at the far end of Ellesmere Island. Building materials and two years' supplies will be cached within easy freighting distance of the point where men will be detailed for patrol duty on the lonely shores of Riel straits.

Appointments recently made through the office of the Comptroller Canadian Pacific Railway headquarters are W. J. Cherry who becomes Freight Claims Auditor in place of J. R. Stone retired under pension rules, and W. L. Moran appointed Assistant Freight Claims Auditor. Both these gentlemen have been connected with the Freight Claims department for many years past.

Because the prospects for hunting and fishing in northern regions of Quebec are more attractive this autumn than they have been for several seasons, the number of residents of the United States applying to the Quebec association for the protection of fish and game for guides and licenses is much greater than it has been for some time, according to the secretary of the association.

A very pleasing incident occurred during the visit to Montreal of Madame Maria Jertza, world-famous operatic star. Col. George H. Ham, "Grand Young Man" of the Canadian Pacific Railway who had met the singer before, sent his felicitations in the form of a bouquet, and Madame Jertza replied with a bouquet of roses made of sugar with the hope that his days also would be sugar-coated. She gave a one-night recital in Montreal, leaving for Toronto the following day.

Isaac Gouverneur Ogden, vice-president in charge of finance, Canadian Pacific Railway, attained his 81st birthday October 10. Mr. Ogden is as active as ever although he has spent 54 years in railway work. He joined the C.P.R. as auditor of the western division with headquarters at Winnipeg in 1881 and has been vice-president of the system since 1911. Mr. Ogden was the recipient of flowers and congratulations from his colleagues on the occasion of his birthday.

Carelessness and lack of forethought on the part of some unknown motorist at Belleville might have led to serious accidents if it had not been soon discovered that the wig-wag signal protecting the C.P.R. level crossing on the Kingston Road was out of order. Investigation showed that an automobile had driven out of its course and across the relay race thereby cutting the electrical contact. A watchman was immediately placed at the signal until necessary repairs had been made.

The Montreal Windsor street station police team are the champions of the Quebec district in the First Aid contests held at the Place Vigor held in that city under the auspices of the Canadian Pacific Railway. They won the contest against teams from Ottawa and Quebec and are now holders of the Capitula Chalmers Cup emblematic of the C.P.R. First Aid championship of the province. The championship of the New Brunswick district was won by the Medford team who defeated against Saint John and Miramichi.

REVIEW-ADVERTISER OFFICE

sonally taken modern themes as for instance in her story "The Emperor's Candlestick" and she is particularly interested to see the influence of new conditions in a new country upon European races.

Her favorite author is Joseph Conrad, who like herself learned English as a foreign language although he eventually attained a greater mastery of that language than any English writer of his day.

While seeking local color in the vicinity of Quebec City, Baronesse Orszay came across one of the oldest houses in the city, the Asselin Farm House, which is two hundred and fifty years old, and is in the tiny old-world village of St. Famille, in the Ordonn, just outside Quebec.

The Baronesse quickly made friends of the Asselin family and was fascinated by their beautiful home. In the picture showing the interior of the ancient house, the eldest surviving member of the family is seen with her great-grandchildren to whom she loves to tell stories of the stirring romantic days the old province has passed through.

Canada's Natural Resources Harvest

Canada a Good Country to Live In All the Year Around

The natural resources intelligence service of the department of the interior at Ottawa, says, "From the south we are told that there is sea bathing, golf, tennis and other summer sports—just what Canada has been indulging in for the past six months. They have no chance to offer to the active and energetic red-blooded Canadian. The south may appeal to the invalid, or to the person who has passed the prime of life and requires a warmer climate, but Canada has her own appeal. Who would compare the pleasures of skiing, of hockey, of skating, tobogganing, snowshoeing, or of the long tramp on a horse, with the pleasures of the snow sparkling in the sunlight, with the languor or basked in the warm climate of the south? Even in her selection of the best of Canada, Canada has a choice of the more northerly countries of Europe owing to their greater energy."

"Canada's winters are one of her assets, and this is becoming more generally recognized. Her people are enabled to rebuild their vitality, depleted by the heat of summer, they are able to indulge in an entirely different range of outdoor sports, broadening their exercises, and, with the passing of winter they can look forward to their summer again. There are many countries, but only one Canada, and Canada is a good country to live in all the year round."

A Storehouse Of Oxygen

Why Fish Can Remain Motionless in Water Without Sinking

A fish is much heavier than the water and yet it can remain quiet in the water for a long time without sinking, and can raise or lower itself rapidly. Why is this? Because inside its body is a gas called oxygen. It is a storehouse of oxygen. The air is lighter than the water, so that air-filled bags help to keep the fish afloat. Not all fishes have air-bags, because all do not need them. Fishes that spend much time in the mud or on the sandy at the bottom of the water, like flounders and sole, do not have air-badders. But the catfish, sturgeon and cod have an air-badder. When the fish takes the air-badder open into the food-tube, in others it does not do this, but gets its oxygen from the blood vessels which pass into its walls. The fish takes its oxygen through its gills. Water is taken in through the mouth and forced out over the gills, which get air so as to see red because they are filled with blood. The blood takes up the oxygen from the water and carries it to all parts of the body. The blood also carries waste matter from the body to the gills and there forces it out into the water.

Gas Masks For Army Animals

Protectors Against This Means of Warfare Has Been Devised

Although the use of poison gas in warfare may be outlawed, the United States army will be prepared to protect its carrier pigeons, horses, mules, dogs and other animals from the fumes should occasion arise, for special masks have been devised to shield beasts and birds in the service. The protector for horses and mules consists of a cheese-cloth bag which covers the nostrils and upper jaw only, for they breathe only through the nose so that it is not necessary to cover the mouth. Their eyes need no protection against fear for they have no tear ducts, and the dog mask is similar, but covers both upper and lower jaws. The pigeons will wear an protector with in flight, but will be guarded from gas by a special shield carefully covering their transport cages—Popular Mechanics.

Weapons Criminals Use

Criminals of different nationalities use different weapons for their ends. The English seem to prefer metal knuckle-dusters. In Paris the Apache uses a knife or revolver. Desperadoes of Italy prefer the stiletto, Spaniards the stiletto and knife, and Americans the revolver.

For Farming In B. C.

In the new colonies incorporated in British Columbia, there are more than three farm farms. There are several fox and mink farms now operating and several under process of organization.

Children in the Irish primary schools are required to study the Irish language.

Curious Building To Be Demolished

Walls of House in England Decorated With Human Bones

The postmaster general, having sanctioned the erection of a new post office at Shepperton-on-Thames, Middlesex, one of the most curious in the country, will pass away by the demolition of the existing premises. The post office is kept by C. C. Newman, who also keeps a general shop and a grocery. The house part is very old, and is actually less than five years appearance, with its low-pitched eaves supported by the old oak beams, and almost every room having a different floor level.

But the exterior of the house is the strangest part of it, for the wall facing the street, immediately below the roof, is decorated with scores of human bones. The house is probably 600 years old, and tradition has it that the bones were still fairly hot in the wall, were placed there when it was built. Where the bones came is a mystery, but legend has it that they were dug up near the River Thames, close by at the spot where it is supposed John Caesar crossed with his boats. Some 60 years ago when Mr. Newman's father took over the premises, the lower part of the house was still decorated with the human bones, and a window was framed with them. These, however, were destroyed during alterations.

Can Never Pay Fine

Would Take English Captain Over Two Thousand Years

It is understood that Captain Cecil Herbert Atfield, who has been in British Prison, Brixton, 12 months in connection with the gun-running scandal of last year, will be released on or about October 12.

He was fined £120,000 for exporting guns without a license—treble the value of the smuggled goods, and not having the means to pay he was sent to prison.

It was stated that the guns, which were transported in numerous ways, for Russia or a state on the Russian frontier.

To pay the fine by devoting his prison earnings of £125 a week to that end he would need to live more than double the age of Methuselah—to be exact, 2,000 years.

King George Reads Bible Daily

"King George has it that he knows that he made a mistake of the Bible every day of his life," says a speech at A. R. M. Smith said in a speech at a Bible and Empire demonstration held at Windsor under the auspices of the World Evangelical Alliance.

Admiral Smith's speech was a condemnation of Bolshevism on account of its rejection of the Bible.

Big Game Prospects Look Good This Season

A LAKE NIPIGON CAMP BUNGALOW

BRINGING IN THE MOOSE HEAD

THE MONARCH OF THE WILDS

Country adjoining Jack Fish River on the east has, according to Mr. Ripley, the largest supply of moose, deer and black bear in Ontario. Bear Paw Lake and Lake of the Woods, situated northeast of Nipigon, both unglaciated, are the habitat of moose in plenty. The same territory shows many signs of caribou, and black bears have been seen there in the past two seasons. The supply of deer and moose near Nipigon is very large. Most reports indicate an increase in account of the passing of the timber activities in the regions of Camp Lake, Indian Lake and Orange-Union Lakes.

Filling Orders For Tree Seeds

Domestic Forestry Branch Supplying Britain, Europe and New Zealand

A large order was received lately by the Dominion forestry branch for tree seeds to be used by the British forestry service.

In addition orders from New Zealand and many parts of Europe are being filled. The seeds will be gathered from localities where conditions are suitable to meet the requirements of the orders and they will be cleaned and prepared at the plants of the forestry branch at New Westminster and Rocky Mountain House. The forestry branch office in Calgary is now making arrangements to gather the seed, but it is not expected that all the orders will be filled this year, owing to the severity of need. The last three years have been marked with poor seed crops.

British want 7,600 pounds of birch, fir, spruce, (cost average); 2,000 pounds of silver spruce (Queen Charlotte Islands); 600 pounds of Douglas fir (British Columbia); 200 pounds of lodgepole pine (Alberta).

Lodgepole made its first order for tree seed in Canada in 1921 and is now on hand is presently a duplicate, which speaks for the success of the Canadian tree seed in British reforestation work.

There are small orders from a number of European countries, particularly Finland.

Canadians Coming Back

Statistics Show Hundreds Are Returning From United States

The following statement in regard to the return of Canadians from the United States has been issued by the department of immigration.

Seven hundred and thirty-three former Canadians who have lived in the United States more than six months, returned to Canada in the first nine days of October to make their permanent home here, according to statistics compiled by the department of immigration. Of these, 475 immigrants entered Canada from the United States and the entry of tourists and other non-immigrants swelled a total of 2,625.

New High Yielding Oat

The department of agriculture's experimental station in New York state has developed several new high yielding varieties for cultivation in New York. It was announced. Six varieties have been tested on New York farms for four years, showing an average yield of 50 bushels to the acre, against an average yield of present crops of 31.5 bushels to the acre.

Saving Requires Will Power

People With Small Income Can Always Save Something

One frequently hears the statement made, "I cannot save money because my income is too limited."

This is one of the most common excuses offered by persons who are not thrifty.

A man earning \$10,000 a year may say this with apparently honest conviction.

Another man earning \$1,000 a year may say the same thing with the same honest conviction. Ask the \$1,000 a year man if he could save any money on \$10,000 a year and he undoubtedly would say, "Yes."

But the chances are he would not. It has been proved many times that those who are unwilling to make the sacrifice necessary to save on limited incomes are just as unwilling to make sacrifices when their incomes are increased.

Saving money is not a matter of income. It is a matter of will power.

Most men who are not thrifty have had to do so at great odds.

Having money on a limited income does require faith. But because of this the savings fall on additional value. It is not the amount of money that counts in the long run; it is the amount of character necessary to produce the savings.

Do not be misled by the excuse that you cannot save money because you do not earn enough. If your income is limited, your savings will necessarily be meager, but they will grow in time and will bring all the greater rewards because of the added sacrifice they cost.—By S. W. Straus, President American Society for Thrift.

New Citizens For Canada

Mrs. Settlers Have Arrived For Reception At All Stations

Canada is still the land of opportunity and a country where industrious men may make good, as evidenced by the arrival on the White Star-Dominion liner Regina of a family of 12 persons coming to this country to join around their families of the same family residing in Toronto.

The new citizens are the family of Hector Adams, of Belfast, Ireland. They will settle at Kingsville, Ont.

Arriving by the same boat was a company of 20 youths from England, who are travelling to Alberta to take up farming, following an initial course of instruction in Canadian methods.

One of the scientists says there is brain food enough in a lump of sugar to produce the plays of Shakespeare, but aspiring playwrights, before buying sugar, should note that he adds it must meet a brain like Shakespeare's.—Boston Transcript.

Relics Of Mount Builders

Eight Skeletons Of Men Of Ancient Race Found Buried In Indian Farm

Eight skeletons, one of them clad in copper armor and a hoard of rare weapons and bits of personal adornment have been found in a mysterious mound on the farm of Grove Voeberg, near Walkerton, Ontario.

Voeberg, 70-year-old farmer, had long desired to know the secret of the mound which, according to local tradition, dated back hundreds of years. Secretly excavating the pile of earth, he came upon strange burial places.

The eight skeletons lay in circular formation, arranged like the spokes of a wheel, with skulls pointing toward the center. Hands and other bits of armor adorned the skeleton of one man, who apparently had been of giant stature. In this skull was embedded a beautifully chipped flint arrowhead.

The soil center of the mound revealed other treasures. Three pounds of iron, believed to be of other alloy or white gold, he with the bones. There were corroded copper bands, which antiquarians here believe were used to bind war clubs. Two pipe bowls, one of smooth black stone and the other carved with the replica of a fantastic monster, were found.

The belief that the bones are not those of Indians, but belong to the ancient and little known race of mound builders, has arisen, due to the great size of the bones, and the fact that skull formations are not those of Indian types. The skulls seem to have little forehead, and the eye cavities are high in the head.

Care Of Infants

Says Women Do Not Know How To Feed Babies

"To my mind, one of Canada's miseries today is the fact that her women do not know how to feed babies, and it is to show the absolute importance of bringing up the babies of the country under the most hygienic methods so as to ensure an efficient physical development, that the Red Cross is concentrating largely on the problem in its present time program," announced Dr. James Wilson Robertson, C.M.G., Ottawa, chairman of the Dominion executive of the Canadian Red Cross organization, who was the guest of honor at a dinner given by the Winnipeg branch of the society.

Lethbridge Irrigation District About one hundred farmers have taken land in the Lethbridge northern irrigation district this year. Approximately 60,000 acres in this scheme are now under crop, an increase of 20,000 acres over the estimate for 1925.

There are more than 100 languages spoken in New York. On one corner on the East Side a news dealer handles 25 newspapers, each printed in a different language.

No Fear Of Brain Fog

Continuous Mental Activity Over Long Period Is Not Harmful

As a pill to mental effort, Sir Arthur Keith, eminent surgeon, speaking on student habits, maintains that the human brain is very tough, that study to the utmost limit of endurance, and that it takes it.

The conservation seems part and parcel of the physical assurance, to shame sluggish students, that a hard work kills anybody. But the hardest physical work it is fairly well established, does it prove that coal heaver and longshoremen die young. Indoor workers, last however, escaping extreme physical wear and tear. The point the British surgeon makes is that you may overtax physical endurance, or damage the body by neglecting exercise, but cannot use your brain enough to damage it.

The brain is a specially used implement. It seems William James was certain that the average person employs only a small part of his mental energy, long continuous mental activity over long stretches is not harmful, the sleepless tales have indicated.

The mind is a wonderful long-distance runner. It is not, however, that not a student need have the slightest fear of excessive exertion, he is still at an athletic level. He would be glad to be an intellectual sprinter if he could. Sir Arthur Keith's remark, "You will not tire in using the brain up to its full capacity," is not encouraging. Why is that a hopeless assurance, any more than using a muscle for all it is capable of?

Some men, obviously, have done so. Dr. Steinmetz, for example, seemed almost to be disembodied; his attention was a marvellous tool. The psychologists know well enough, or believe they do, that brain cells have a vast store of unselected energy, but they cannot direct it to any task which can supply the key—New York Herald-Tribune.

Was Hardly Qualified

One U. S. Ambassador To Turkey Knew Nothing About Country

Secretary Kellogg, disgraced on a diplomatic mission, said recently to a correspondent:

"Our ambassadors deserve most of the credit for diplomatic blunders. We choose our ambassadors with care. They know down to the ground the people they serve among. But it wasn't always they lived."

"There's a story about a millionaire who, having contributed \$65,000 to the campaign, and his name was rewarded with the appointment of ambassador to Turkey."

"What are your qualifications for this post?" asked the millionaire. "I've stony one day." Do you know the Turks?"

"Do I know them?" said the new ambassador. "Sure! Why, once I passed through Constantinople on a Cuck's tour and lunched with the famous Turkish banker. 'Twixt Dallas, by gosh!'"

The reporter was impressed and said:

"I think I've met Twiflex. He wears a fox, doesn't he?"

"No," said the new ambassador, "he's clean shaved."—Chicago Daily News.

Modern Machinery Is Speedy

Makers of Shot Turn Out Half Million a Minute

Many men make close observations because of their close observation of natural laws.

For instance, a Briton in the eighteenth century, after noticing that rain drops and hail stones were round, conceived the idea that if he could drop molten iron from a crane it would form round heads of lead.

The experiment was tried and was successful. The iron was made in the manufacture of shot.

Modern machinery now enables makers to turn out a half million shot a minute.

The molten lead is sifted through a screen with meshes of the size desired and allowed to fall to the foot.

A vat of water at the foot of the vat catches the pellets, cooling them. The pellets are dried and passed through a sifter. Finally they are put into a revolving box of black lead, which gives them the finished round shape and polish.

Sees Great Future For West

Ties That Bind British Empire

Unity Should Be the Creed of British People Everywhere

The possibilities, the greatness and the time that bind the British empire were dealt with by Sir Frederick Tuckwell, of London, Eng., vice-president of the British Empire Institute, before a joint meeting of the Canadian Club and the Women's Canadian Club at Ottawa. The empire was such a one as the world never before had witnessed and never would again, should it be disrupted, he said.

The empire today and after the days of the Great War has been a puzzle to all foreign nations. Germany had pointed out it and had arrived at an estimate which even had proven decidedly wrong. Germany's rulers and people had looked over events within the empire and had decided their time was ripe, that the British empire was ready, and in many quarters willing, to fall apart. Germany had decided war would bring about the disintegration of the empire.

The main reason for the formation of the empire was that the British had been to bring together component parts of the far-flung empire, and to maintain unity.

The welfare of the crown and the unity of the empire should be the creed of British people everywhere," said the speaker. "The empire is the result of every part of the empire depending. That was its main mission, to the people of the British empire, no matter where they lived."

There was the possibility of danger in the belief that all sections of the empire were united. The empire desires, that all parts were equal. There was the question of position. New Zealand, with its position and a large people could expect an equal vote with the Mother Country's forty-five million. The problem of the empire was to be solved by the empire, and the heavy taxation was causing trouble on this account of present.

Foolish Saving

A penny saved is not always a penny earned. Sometimes it is two pennies lost. The merchant who spends nothing on advertising loses much more than he saves.

The money spent for plate glass windows is not pocketed on as lost; nor is the money spent on better interior lighting.

Anything that increases the favor, that adds sales, that multiplies customers is very properly regarded as a good investment.

Advertising is a good investment — just as plate glass windows are. Advertising sells more goods to more persons than shop windows do.

A WORD TO THE PUBLIC

Do you resent having a merchant address his message to you in the form of an advertisement in our columns? On the contrary, is not your impulse to respond to his friendly overtures?

Claresholm Local News

Bethel United Church

"The Church at Prayer," will be the pastor's theme next Sunday morning, November 22, at the 11 o'clock service. This will be another of the studies in Ephraim series.

At the evening service the pastor will speak on "The Church at Work."

These practical Gospel messages are chosen in furtherance of the spiritual campaign inaugurated through the United Church of Canada for these fall and winter months.

Regular mid-week services are held in the lecture room each Wednesday evening at 8 o'clock to which all are cordially invited.

Nazarene Church Announcements

Holiness becometh Thy house, oh Lord, forever.

Friday night, Young People's meeting. Mr. J. W. Hallett will speak and Mrs. Geo. Ringross will sing.

Prayer Band and healing service Saturday night, 8:30 o'clock. Sunday, 10:30 a.m., holiness meeting. Subject, "A Good Soldier."

3 p.m., meeting in Greenbank school.

7:45, subject, "It is Finished." The ever increasing crowds at these great evangelistic meetings is a sure proof that there is a blessing to all those that are attending. God is truly with us. We preach just the whole Bible and nothing but the Bible.

The same quartette that has pleased others will please you with their singing next Sunday night. Their song will be "Constantly Abiding."

A friendly church with a friendly welcome to all.

Four Square Gospel

Meetings conducted by Evangelist R. A. Reynolds, and wife, in Odd Fellows' Hall, Sunday, November 22nd.

11 a.m., worship.

3 p.m., A call for decision.

7:30 p.m., Thieves and robbers.

Full salvation for body, soul and spirit. The lowly Nazarene is still in our midst working miracles of healing. Are you sick in body? Come and Jesus will heal you. Are you troubled in soul, enslaved by sin and habit? Jesus will set you free.

Good music and singing.

Everybody welcome.

Monday, 8 p.m., Orchestra practice.

Tuesday, 8 p.m., Bible study and prayer (Bro. Thomas' home).

Wednesday, 8 p.m., Young People's meeting (Bro. Reynolds' home).

Thursday, 8 p.m., Prayer meeting (Bro. Thomas' home).

Mrs. Lalo's Dressmaking Shop

Dainty aprons, lovely new house frocks in the latest styles, made from first class prints and ginghams, all patterns and colors, and in all sizes. No rush factory-made garments in my shop, no rough uneven stitches, no slipshod, hither-miss finishing; then too, the Val edging, piping and French seaming is evenly applied, making in all a beautifully finished dress you can wear any time. A nice gift for mother, sister, or a friend. Men's flannel shirts. Prices reasonable.

Biggest Cattle Drive in History in "North of 30"

The final long-horn cattle drive in the history of the world took place recently when the last great herd—over four thousand in number—started from Texas, towards the railroad in Abilene, Kansas.

The journey was made in connection with the filming of the historic Emerson Hough novel, "North of 30," an Irvin Willat production for Paramount, coming to the Rex theater Friday and Saturday, November 20-21.

Headed by Lois Wilson, Jack Holt, Ernest Torrence, and Noah Beery, who have featured roles in the production, and followed by an army of cowboys, chuck wagons, oxen and Indian guides, the tremendous herd of long-horns swung out of the big ranchyard and started across country in the direction of Abilene, Kansas.

The herd of 4000 long-horns is the only remaining one in the world—stock men having replaced them with a superior breed of beef. According to the owner of the cattle, the drive is the first one of its kind in almost forty years. It will also be the last. Almost immediately after the "North of 30" was completed he marketed the stock.

BUSINESS LOCALS

Young married couple want position on farm for winter; good teamster; small wages. Write J. A. Scott, Box 15, Parkland, Alta.

For Sale Cheap—House and five acres tract close in, east of Pioneer elevator, all in cultivation; also Gray Dort touring car. Cash or easy terms. For further information write to W. G. McElrath, Raymond, Washington, Box 924.
